SUMMARY

Computer Science student with a strong interest in full-stack web development and AI-powered applications. Experienced in building scalable web platforms using React, Supabase, PostgreSQL, REST APIs, and modern frontend technologies. Passionate about creating real-world products, integrating AI services, and developing interactive user-focused applications in fast-paced startup environments.

SKILLS

- **Programming:** Java, Python, JavaScript
- **Frontend:** ReactJS, HTML, CSS, Tailwind CSS
- **Backend & APIs:** REST APIs, Flask (basic)
- **Databases & Authentication:** PostgreSQL, Supabase, MySQL, MongoDB
- **AI Integration:** Gemini AI API, Web Speech API
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS
- **Tools:** Git, GitHub, Jupyter Notebook

WORK EXPERIENCE

Edunet Foundation

AI Intern

May 2025 - June 2025

- Developed a Flask-based Flight Price Prediction web application integrating ML models with backend services
- Built REST APIs to process user inputs and return real-time predictions
- Performed data preprocessing, feature engineering, and model optimization achieving ~85% prediction accuracy
- Collaborated on project development, debugging, testing, and documentation workflows

PROJECTS

PrepwithAI-AI Interview Preparation Platform [↗](#)

- Developed an AI-powered mock interview platform using React, Supabase, and PostgreSQL
- Integrated Gemini AI API to generate role-based interview questions and automated feedback
- Implemented features such as voice/text answer submission, camera monitoring, and tab-switch detection to simulate interview environments
- Worked on frontend integration, authentication flow, and improving real-time user interaction experience

Flight Price Prediction using ML [↗](#)

- Built a machine learning-based application to predict airline ticket prices using structured travel datasets
- Performed data preprocessing, feature engineering, and trained ensemble models including RandomForest and ExtraTrees
- Developed backend integration for serving real-time prediction outputs through a web interface
- Achieved ~80–85% prediction accuracy through model optimization and evaluation

EDUCATION

Malla Reddy Engineering College For Women

Bachelor of Technology(CSE) - 8.96

2023 - 2027

ACHIEVEMENTS

- Top 2% National Finalist – India AI Impact Buildathon (GUVI & HCL)
- NPTEL Certification – Programming, Data Structures and Algorithms using Python
- Secured All India Rank 12,911 in Naukri Campus Turks 2025 coding challenge
